

ATTACK

Audits (intrusion tests, SAP audits, ...) report the various strengths and weaknesses of an information system in order to validate or improve security.

DEFENSE

Our engineers' experience will help during code reviews, information security guidance and conformance to various standards.

INVESTIGATION

SCRT are well reknown for their experience in analysing compromised systems, fighting counterfeiting and optimising networks.

TRAINING

Qualified collaborators are key to having an efficient and productive modern computing infrastructure.

WELCOME

SCRT is a 2002 founded company entirely dedicated to information security.

SCRT is a flexible company which offers many different services that can either be punctual, such as audits, or more customized, such as the reorganization or the follow up of information network. We are passionate about our work, we believe in what we do and enjoy doing it.

SCRT works for all kind of companies: ranging from some of European largest corporate firms to small businesses.

Since june 2009, SCRT has been certified compliant with ISO 27001:2005. As this certification demonstrates, SCRT is capable of providing a confidentiality level matching the best industry standards as well as your highest requirements.

Choosing SCRT means chossing the ideal partner in terms of confidentiality and rigor for all information security related missions.
