

Absolute Warns Consumers of Highest Risk Areas for Computer Theft

December 15, 2010

Absolute Software Publishes the Top 10 Places Computers are Stolen from and Offers Holiday Special to Protect Consumers

Vancouver, Canada: December 15, 2010– [Absolute© Software](#)

[Corporation](#) (“Absolute” or the “Company”) (TSX: ABT), the leading provider of firmware-based, patented, computer theft recovery, data protection and secure computer lifecycle management solutions revealed today the top 10 target areas for the theft of mobile computers. The maker of LoJack® for Laptops, the leading anti-theft solution for consumers, also announced a special holiday offer on its consumer solution.

The top 10 list reveals that consumer computers are more likely to be stolen while at school or home, where families use their computers the most. The list is based on theft

“The trends in this list may surprise some computer owners. According to our experience, consumers think ‘it won’t happen to me’ and take chances. They often think of security issues only when they are on the move,” said Mark Grace, vice president of consumer business at Absolute Software. “However, with schools and residences topping the list of places computers are stolen, owners need to be extra cautious, particularly around the holidays when home burglaries often increase. LoJack for Laptops helps protect you from computer theft year-round. That’s why we are offering consumers a give one, get one free deal on LoJack for Laptops this holiday season.”

This holiday season, consumers can purchase a license of LoJack for Laptops and receive a second license for a friend or relative, free.* Computer owners can take advantage of this offer by visiting www.lojackforlaptops.com. Once activated, computer owners can access:

- **Geolocation** – For day-to-day use (in non-theft scenarios), consumers can keep track of their computer on an internet-based map. Useful for customers who want to check if the computer’s location has changed while they are away from home.
- **Device freeze** – If a computer is suspected to be simply lost and not stolen, customers can freeze their computer and display a custom message for whoever finds it. In addition, an unauthorized user cannot access the content on the computer, keeping private information safe in an effort to prevent identity theft.
- **Remote data delete** – To protect their personal information, customers can choose to delete a pre-set group of files or all files, including the operating system.
- **Managed theft recovery** – If a computer is stolen, the Absolute Theft Recovery Team will work with local law enforcement to recover it.

Top 10 Places Consumer Computers

Mark Grace continued, “Last year, Absolute recovered over 5,000 computers, and assisted in the conviction of over 500 felons ranging from burglars to murderers. With LoJack for Laptops, consumers can strike back against crime. We protect more than 2 million consumers today, let us give you the same peace of mind - knowing your essential computing device and data are protected.”
