

Powerful open source virtualization

For personal and enterprise use

VirtualBox is a general-purpose full virtualization software for x86_64 hardware (with version 7.1 additionally for macOS/Arm and with version 7.2 also for Windows/Arm), targeted at laptop, desktop, server and embedded use.

Get Started

Download

Download VirtualBox binaries and platform packages

Community

Become a part of the VirtualBox community. Discuss and solve problems in the forums, access test builds, and more.

Documentation

Learn from a variety of resources including user manuals, end-user and technical documentation, the source code repository timeline, or the changelog.

Training

Access labs, tutorials, and videos to learn how to use VirtualBox. Quizzes are available to test your learning.

Join the VirtualBox community

Millions of users actively use VirtualBox

VirtualBox is a community effort backed by Oracle. Everyone is encouraged to contribute. Oracle helps ensure the product meets professional quality criteria and offers support resources for users.
