Spotlight: SecureFlag

SecureFlag empowers organizations in 30 plus countries to implement secure coding training. The platform offers thousands of hands-on labs in over 45 programming languages, hosted in virtualized environments. Developers gain skills to identify and remediate vulnerabilities, building secure software from the start. Through plugins, we integrate with the Software Development Life Cycle, embedding secure practices into workflows. Our customer success team designs bespoke training programs tailored to organizational needs. SecureFlag also offers ThreatCanvas, an automated threat modeling solution enabling developers to assess and mitigate design risks independently, reducing reliance on security teams.
