for some attack patterns to align with more than one category depending on one’s perspective. To counter this, emphasis was placed such that attack patterns as presented within each category use a technique not sometimes, but without exception.

▼ Relationships

The following graph shows the tree-like relationships between attack patterns that exist at different levels of abstraction. At the highest level, categories exist to group patterns that share a common characteristic. Within categories, meta level attack patterns are used to present a decidedly abstract characterization of a methodology or technique. Below these are standard and detailed level patterns that are focused on a specific methodology or technique used.
